# Personal Data with openEHR

Attribute	Value
_type	COMPOSITION
uid	timur-kaya-personal-data
Name	Timur Kaya
Age	37
Position	Head of Digitalisation & IT
Organization	Kreiskliniken Dillingen - Wertingen gGmbH
Philosophy	Interoperability through open standards
Belief	Empowering healthcare with data sovereignty
Passion	Transforming hospital processes with data-driven strategies

**2 District Hospitals in Bayern**  
(District Hospital St. Elisabeth, Dillingen  
and District Hospital Wertingen)

**299 Beds**

more than 950 **Employees**

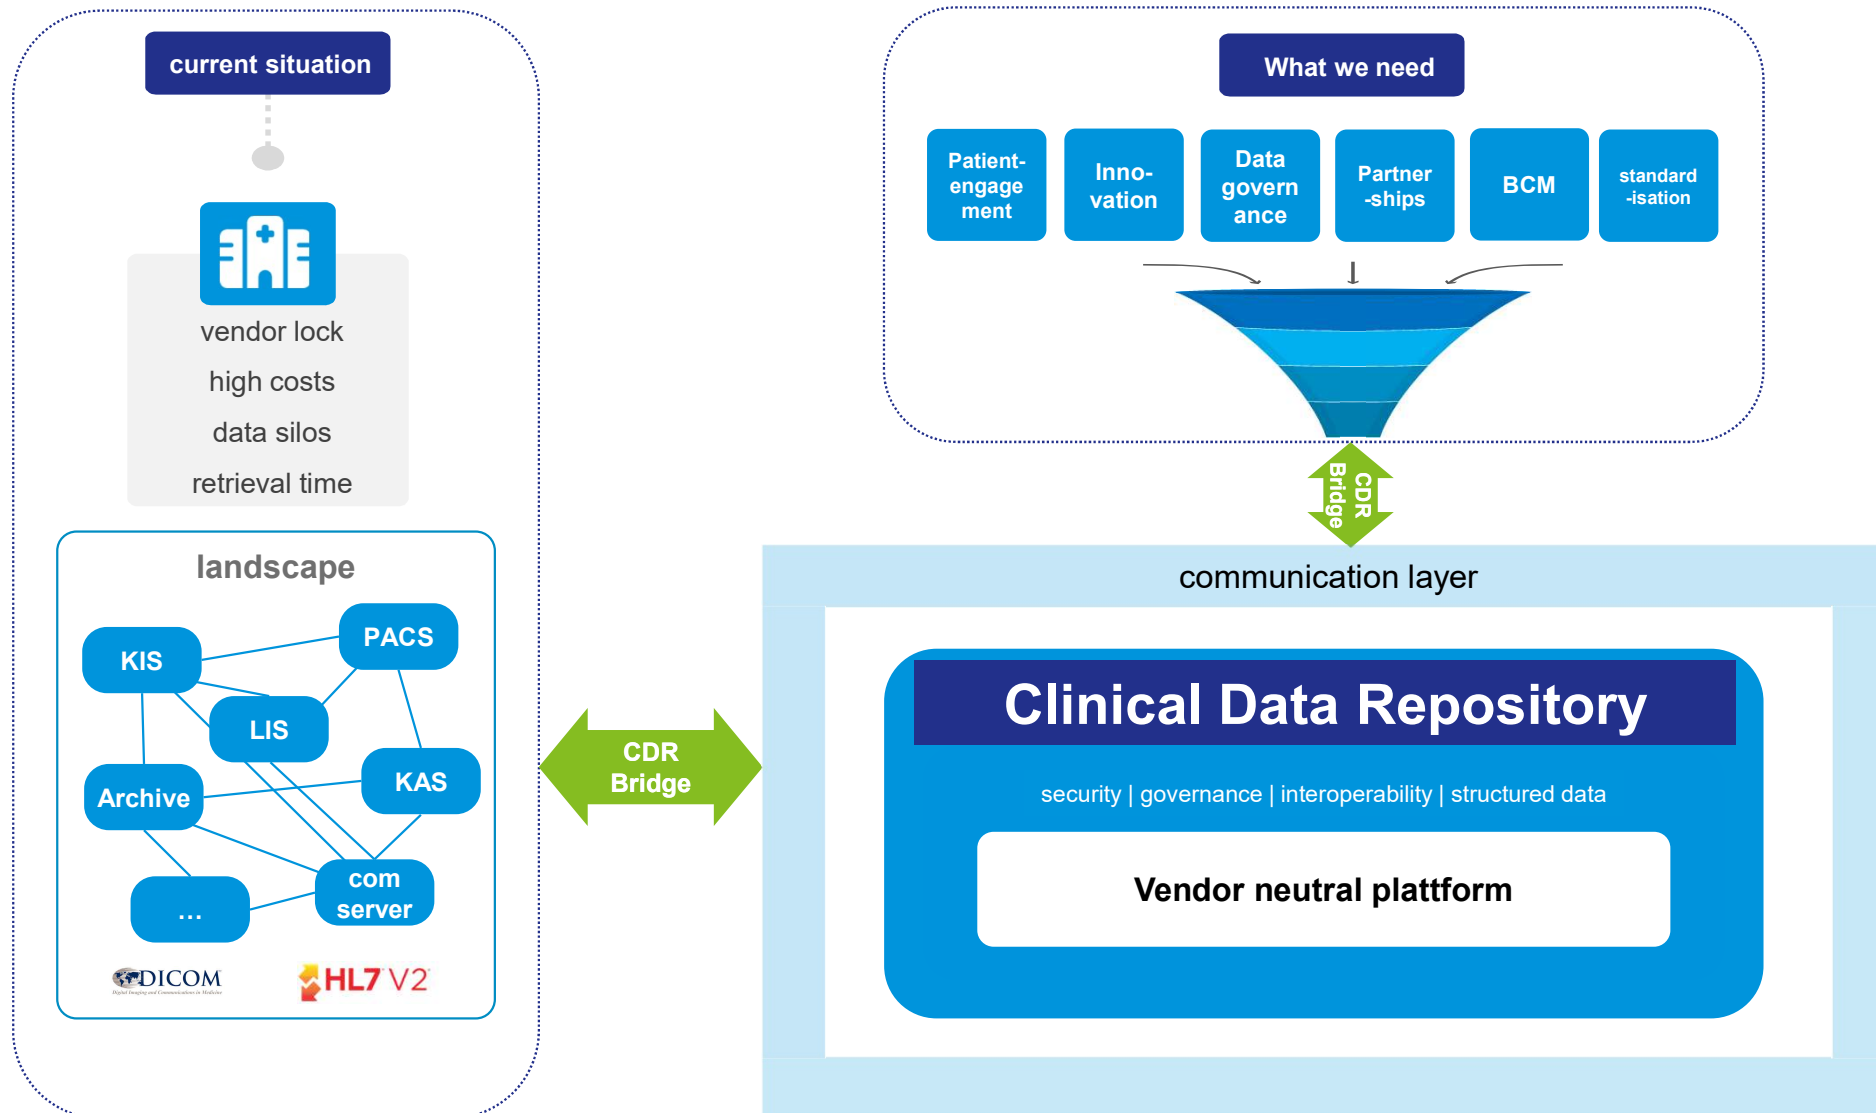

serving **basic and standard care** for  
over **100.000 residents**

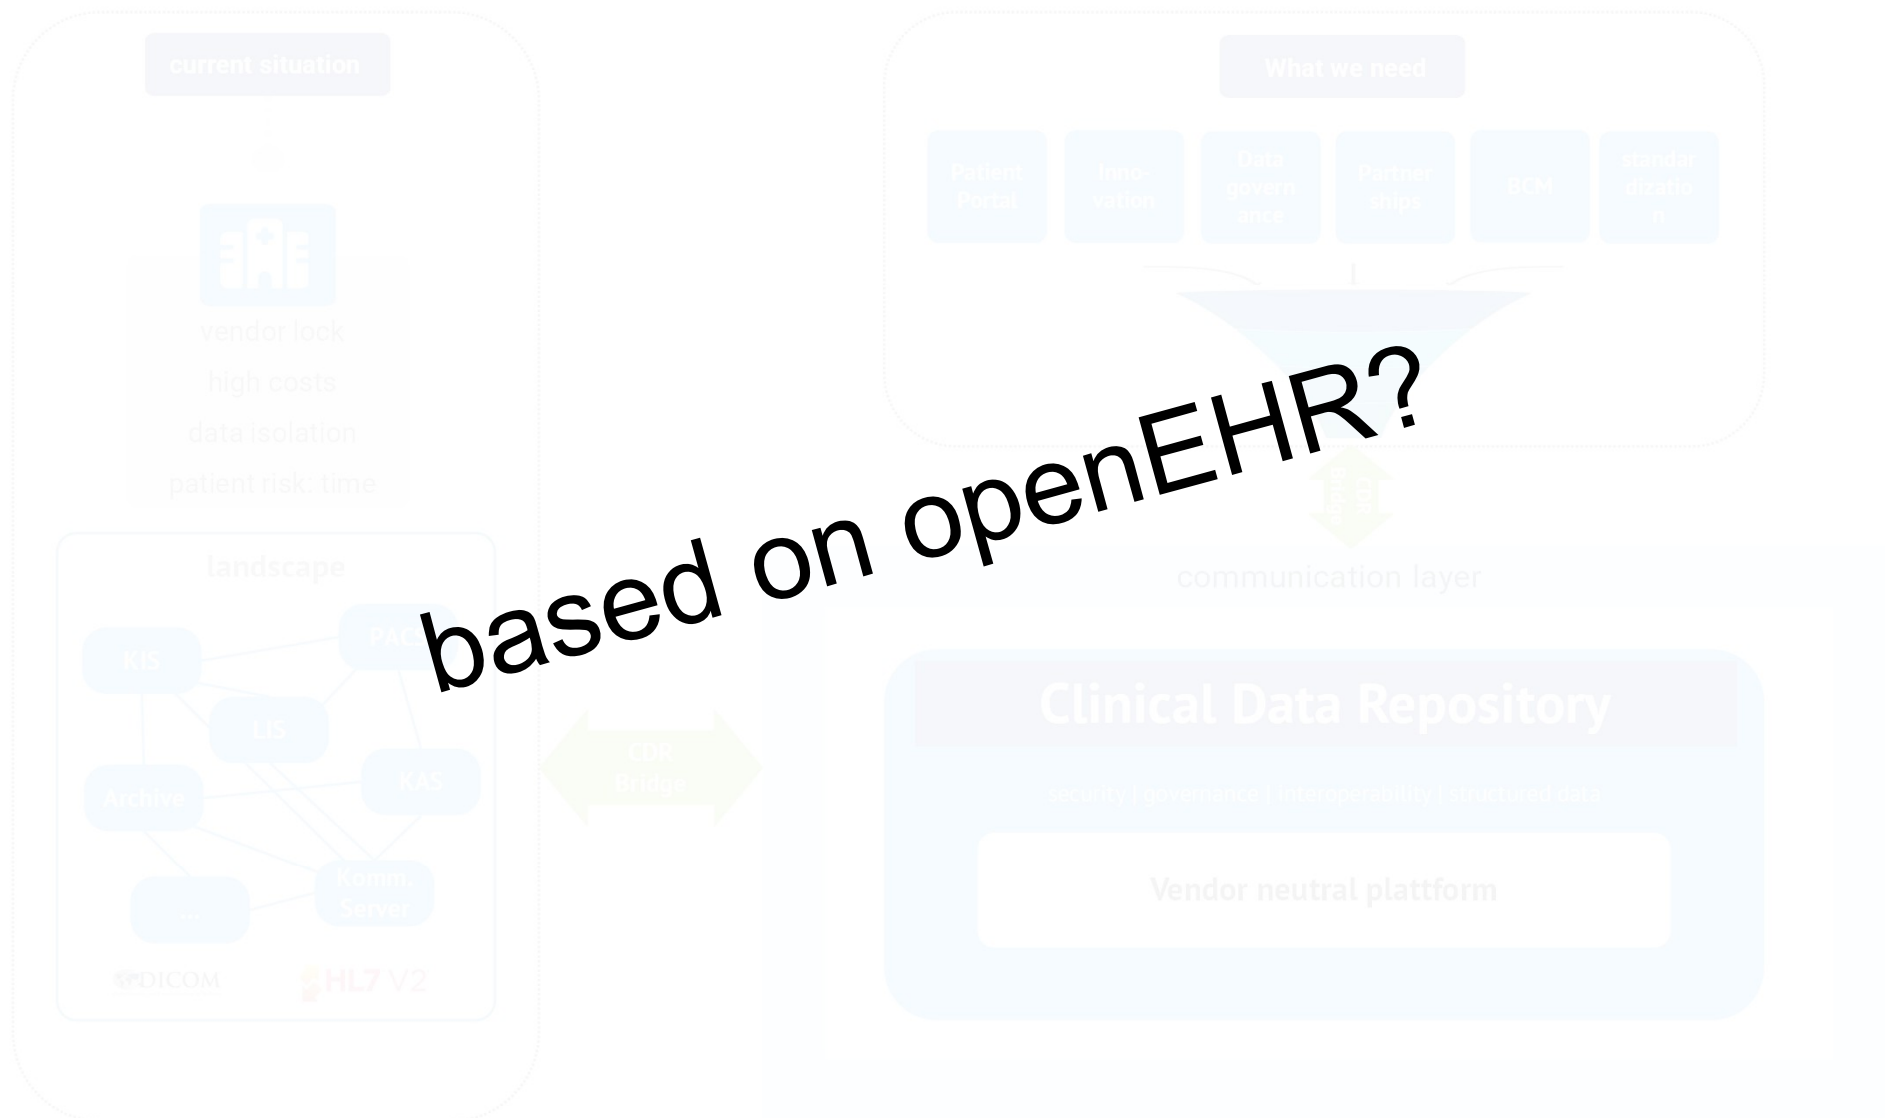

**Academic Teaching Hospital** affiliated with the  
Technical University of Munich

**Kreiskliniken**  
Dillingen Wertingen

# Strategy

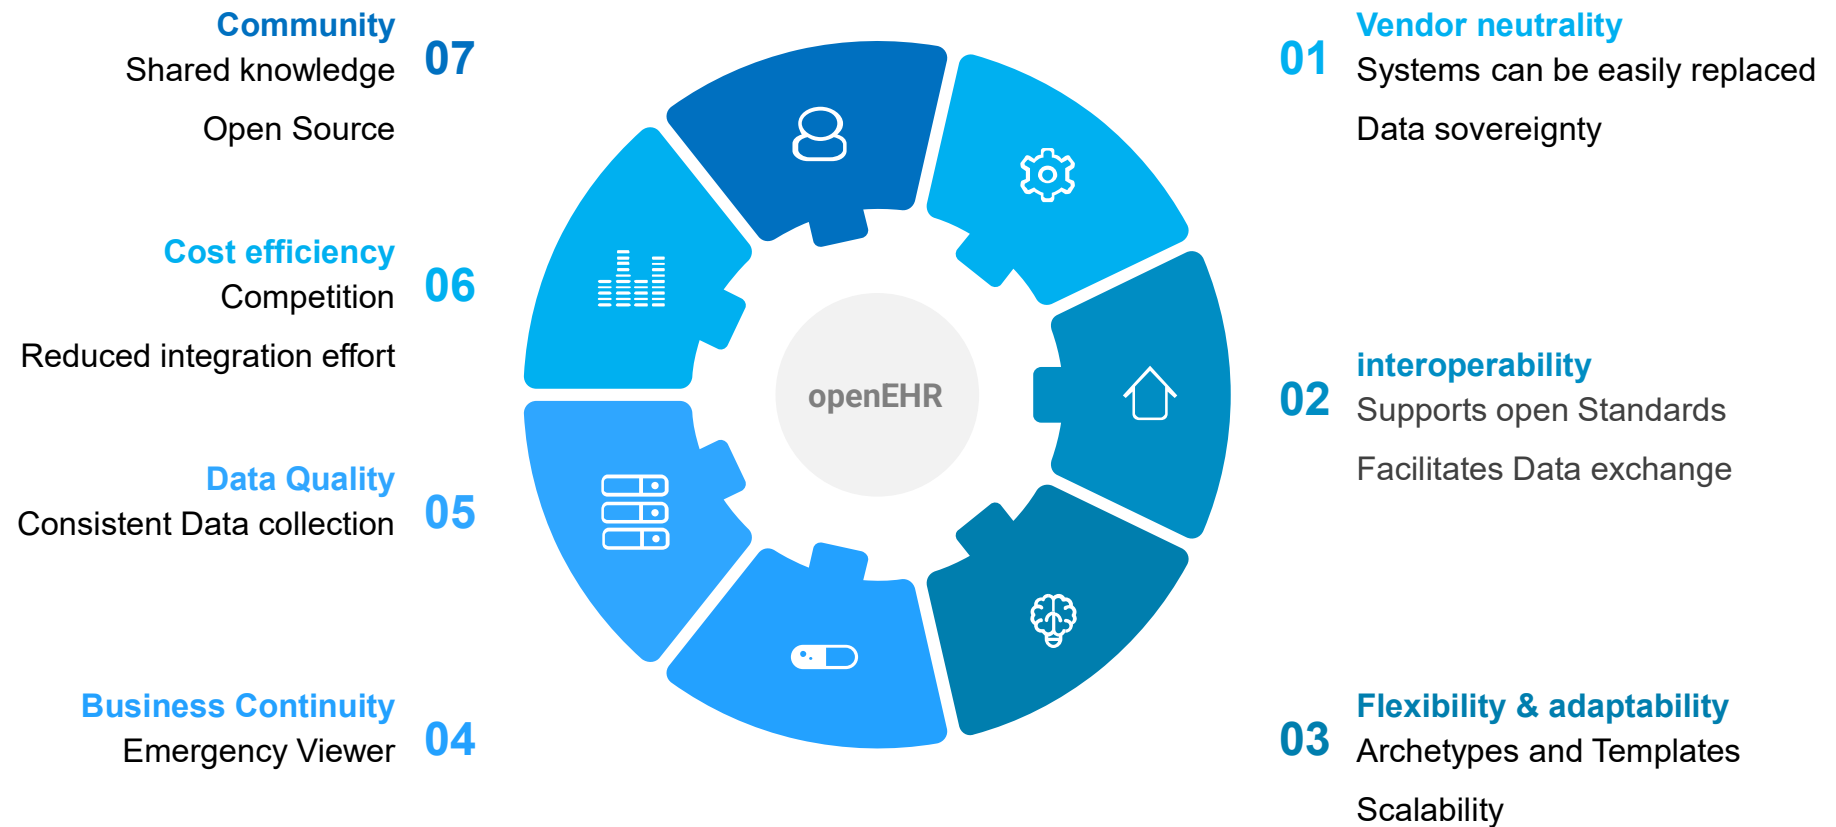

The CDR serves our hospitals as a foundation for all further digitalisation projects.

Long-term, all data should flow into the CDR so that it can be made available to other systems.

Finally, data sovereignty is to be guaranteed independently of the system vendor.

# Love Is in the EHR?

# Key's to breaking barriers

courage  
to start into the unknown

Infrastructure  
put some effort in it

process knowledge  
necessary to find the right solutions

partners  
analyze the market

time & flexibility  
don't stick to plans, be agile

# Next Steps

## implementing

Patient documentation,  
portal & emergency viewer

## innovation

power by structured  
Data

## Use cases

finding solutions based on  
use cases and POC's

## standardization

laboratory data using LOINC,  
FHIR communication

## best of breed

challenging partners and the  
market
